A Marca da Besta é da Microsoft. #ID2020

Amir Tsarfati
@BeholdIsrael

Bill Gates has become a founding partner in another company, this one is called the #ID2020 Alliance, and its goal is to give every human being on Earth a digital id. How do they plan on accomplishing this feat? By combining mandatory vaccinations with implantable microchips.

The question of which businesses should keep going is tricky. Certainly food supply and the health system. We still need water, electricity and the internet. Supply chains for critical things need to be maintained. Countries are still figuring out what to keep running.

Eventually we will have some digital certificates to show who has recovered or been tested recently or when we have a vaccine who has received it.

Digital certificates? Are you saying each person individually will receive a document that says we were tested? Can that be used against us?

No, he's saying Microsoft and MIT developed "tattoo markers" that show whether you have received a vaccine or not. This will be coupled with Gate's new invention, ID2020, which is a digital ID microchip implanted under the skin.

www.sciencealert.com/an-invisible-quantum-dot-tattoo-is-being-suggested-to-id-vaccinated-kids
